TECHNICAL SKILLS

Technologies

HTML5, CSS3, JavaScript, ES6, Typescript.

Frameworks / Libraries

Angular, AngularJS, jQuery, SCSS, Bootstrap

IDE and Version Control

Visual Studio Code, IntelliJ IDEA, GIT.

PROFESSIONAL EXPERIENCE SUMMARY

- Creating UI pages using HTML5, Angular and making them responsive using CSS3 and Bootstrap.
- Utilizing Object Oriented aspect of JavaScript to create and extend utilities. Using ES6 features for code optimization. Strong type checking with Typescript.
- Creating mock server in node.js.
- Adhering to accessibility principles according wai/aria guidelines. Making applications accessible to wider audience by appropriate use of aria tags. Screen reader testing on NVDA, JAWS.
- Unit testing using Karma and Jasmine/Jest. Task automation using Gulp/Grunt.
- Working with Designers and Product Owners for requirement gathering and refinement.
- Collaborating with Server Side for structuring the format of REST API or the shape of JSON data.

PROJECTS

August 2021 – Present (SAP Labs)

Project Title: Fiori OVP

Responsibilities: Working on FIORI Overview Page floor plan. It is a data-driven SAP Fiori app type and floorplan that provides all the information a user needs in a single page, based on the user's specific domain or role. It allows the user to focus on the most important tasks, and view, filter, and react to information quickly.

June 2018 – August 2021 (Barclays)

Project Title: Core Engineering / DSS UI Framework and Smart Future

Responsibilities: As a part of core engineering team, developing UI components so that various mini applications can use it. This allows to have a good UI experience across Barclays mainstream applications – ROLB (retail online banking) and BMB (Barclays mobile banking).

Created DSS UI Framework which provides common functionalities like timeout, popup, spinner, site tagging. Developing and innovating new framework ideas like framework agnostic, micro-frontend and single spa.

Creating a user journey for one of the mini-app namely Smart Future.

March 2017 – May 2018(Persistent Systems)

Project Title: HACH-LANGE-Fusion

Responsibilities: Developed the UI for Sensors and other analytical instruments used to test the quality of water and other liquid solutions. Communicating with Server via REST-API for data collection.

November 2016 – March 2017(Synechron technologies Pvt. Ltd)

Project Title: Payments

Responsibilities: Build the UI for application which generates reports of Credit Card payment for online purchases.

January 2015 - October 2016(Infosys Ltd)

Project Title: ID Workshop

Responsibilities: Build the UI for application which offers full diagnostic of automotive vehicles. Integration with one of the leading suppliers of technical information to the automotive aftermarket (Auto Data). Managing instances of independent workshops and distributors. Integration with VCI for fault diagnosis.

April 2014 – January 2015(Infosys Ltd)

Project Title: CCR HOT CUT TOOL

Responsibilities: Maintenance of a tool named CCR Tool. This tool gathers the requests of American Users who need a cable connection for telephone/broadband or currently have a connection

October 2013-March 2014(Infosys Ltd)

Completed basic web development training in HTML, CSS, JavaScript, jQuery. Created UI for Employee management system as part of pilot project.

RECOGNITION AND CERTIFICATION

- Received “The Value Award” in SAP UX Engineering Q4 2021.
- Received Barclays Value award for demonstrating excellent UI skills in DSS framework upgrade
- Our team was awarded “Best Team” award for valuable contribution in CCR Tool development.
- Successfully completed NSE’s certification in financial market
